

ABOUT US

Department of Forensic Science trains individuals in investigation and analysis of crime scenes and related evidences with scientific knowledge, processes and highly specific skills to solve criminal and civil cases.

SCOPE

Forensic science describes the science of associating people, places, and things involved in criminal activities; these scientific disciplines assist in investigating and adjudicating criminal and civil cases.

As per recent remarks of Hon'ble Home Minister of India, there is an urgent demand of forensic scientists who will solve crimes with scientific knowledge while working with police investigators. Forensic scientists are required in government/private forensic science labs; private legal and security firms, government organisations such as DRDO, BPR&D, NIA, CBI; government/private insurance sector; airport authorities etc.
