Registrations for value added course-Basics of Robotics

Applications are invited for the following mentioned value added course offered by Electronics and Engineering department-SET:

Course	Duration	Fee
Basics of Robotics	30 hours	Nil

The registrations for the course are open for all the students of Electronics and Communication Engineering Department.

Interested students are required to fill in the registration form latest by March 25, 2020 till 5:00 p.m.

Details regarding course content and schedule of classes are attached herewith.

For any queries related to the course, kindly mail to: jeetusharma.cet@modyuniversity.ac.in

Value Added courses

Enclosure:

Annexure I: Syllabus

Annexure II: General Guidelines

Objective: This course would facilitate the learner to acquire good exposure in current technologies and also to reduce the gap between academic and industry.

1. **Automation:** Mechanization and Automation - History of Automation - Reasons for automation - Merits and limitations - Automation systems - Types of Automation: Fixed, Flexible and Programmable Automation – Intelligent Industrial Automation - Automation and Robotics. [4]
2. **Fundamentals of Robots:-** Definition - Historical background - Various generations of robots –Robot Anatomy - Robot configuration: Polar, Cylindrical, Cartesian coordinate, Joint-arm configuration - Degree of freedom - Work volume and Dead zone - Dynamic performance: Speed of response and Stability - Precision of movement: Spatial Resolution, Accuracy, Repeatability and Compliance. Robot Drive System: Hydraulic, Electric and Pneumatic. [7]
3. **Introduction to Robot End Effectors, Sensors and Control System End Effectors:** Characteristic features - Types: Mechanical grippers, Magnetic grippers, Vacuum cups, Adhesive gripper, Hooks and Scoops -Tools as end effectors - Robot / End-effectors interface - Consideration in Gripper selection and Design. [6]
Sensors: Transducers and Sensors - Sensors in Robotics: Tactile, Proximity and Range Sensors, Miscellaneous sensors and sensor based systems - Robot Vision System.
4. **Robot Programming and Applications Robot Programming:** Robot Programming: Textural Programming: requirements of robot programming language, Applications: Factors influencing the selection of Robots - Robots for Materials handling, Assembly, Agriculture and Chemical Plants – Advanced applications. [8]
Intelligent Robots - Introduction to Mobile Robots, Legged Robots and Remote Controlled Robots, Automated Guided Robots, Micro Robots - Control and Safety Issues
5. **Lab work:** Experiments on various sensors and drive system in connection with Robotic system. [5]

Outcome: The learners are expected to have an overview learn the introductory concepts of Robotics.

Annexure II

General Guidelines-Value Added Course

1. Tentative Timelines:

Registration opens: 13 March, 2020

Registration closes: 25 March 2020

2. The students are advised to read the guidelines, annexures as well as the embedded Instructions in the registration form very carefully before proceeding.
7. On the commencement of the course, it is mandatory for the students to attend all the classes pertaining to the course.
8. The total duration of the course shall be 30 hours.
9. Concerned department will conduct the exam and also evaluate the same during the course and at the end of course.
10. The certificate shall be provided by department to the students upon successful completion of the course.
11. Concerned department Committee reserves the right to alter, modify or change the content as it deems fit without assigning any reasons to the students.

Certificate Course in Cyber Security

Objectives:

- 1, To prepare students with the technical knowledge and skills needed to protect and defend computer systems and networks.
2. To develop graduates that can identify, analyze, and remediate computer security breaches.

Module	Content
1	Operating Systems Concepts, Introduction to Network topology, Open System Interconnection mode - Working, Protocols and mechanism, Know your operating systems: Windows & Linux, Configuring services, Active Directory, service security and Network configuration.
2	Fundamentals of information security - CIA Triad, Cyber Security Controls, Understanding threats, attacks categories, hacking process, Understanding the network security, basics of cryptography, fundamental of web / mobile application security, data centre security, cloud computing and data security.
3	Introduction to cryptography, Symmetric-Asymmetric cryptography & cryptographic algorithms, Hash functions, Applications of cryptography- IPsec, Pretty Good Privacy, Secure Socket Layer (SSL), TLS, Understanding digital certificates and signatures.
4	Introduction to network security – topology, Network configuration, understanding ports, protocols -TCP/IP, UDP, ARP, Operational processes, Network scanning, understanding packets and network specific attacks, vulnerabilities, DMZ, Packet filtering, firewalls, Iptables, TMG threat management gateway, network security tools (scanners, sniffers etc) and countermeasures.
5	Client-Server Relationship, Vulnerabilities in web server and applications, Attack methods- Buffer overflow, SQL injection, cross site scripting, session hijack etc., Secure Coding Practices, OWASP top 10 vulnerabilities and mitigation techniques, Web Application vulnerability scanning tools (Nessus), Web application security challenges.
6	Audit planning (scope, pre-audit planning, data gathering, audit risk), Risk management, Risk analysis, 3 phase approach – Risk assessment, mitigation and reassessment, Log analysis, OS auditing: Windows auditing, Linux auditing and Device auditing.
7	Cyber Forensics phases (Preservation, Identification, Extraction, Documentation, Interpretation), EDR, tools and standard operating procedures for Disk forensics, Social media and network forensics, Mobile and CDR forensics.

Outcomes:

1. Analyze and evaluate the cyber security needs of an organization.
2. Conduct a cyber security risk assessment.
3. Measure the performance and troubleshoot cyber security systems.
4. Implement cyber security solutions.

Objectives:

1. The ability to analyze data skill that helps student to make better decisions.
2. making data analysis available to the average person at any organization.

Data Analytics using Excel

Introduction to Excel and Data Analytics: About Excel & Microsoft, Uses of Excel, Excel software, Spreadsheet window pane, Title Bar, Menu Bar, Standard Toolbar, Formatting Toolbar, the Ribbon, File Tab and Backstage View, Formula Bar, Workbook Window, Status Bar, Task Pane, Workbook & sheets (5 hours)

Columns & Rows Selecting Columns & Rows, Changing Column Width & Row Height, Autofitting Columns & Rows, Hiding/Unhiding Columns & Rows, Inserting & Deleting Columns & Rows, Cell, Address of a cell, Components of a cell – Format, value, formula, Use of paste and paste special (3 hours)

Functionality Using Ranges Using Ranges, Selecting Ranges, Entering Information Into a Range, Using AutoFill (2 hours)

Creating Formulas Using Formulas, Formula Functions – Sum, Average, if, Count, max, min, Proper, Upper, Lower, Using AutoSum, Trim, Countif (4 hours)

Spreadsheet Charts Creating Charts, Different types of chart, Formatting Chart Objects, Changing the Chart Type, Showing and Hiding the Legend, Showing and Hiding the Data Table (4 hours)

Data Analysis Sorting, Filter, Text to Column, Data Validation (3 hours)

PivotTables Creating PivotTables, Manipulating a PivotTable, Using the PivotTable Toolbar, Changing Data Field, Properties, Displaying a PivotChart, Setting PivotTable Options, Adding Subtotals to PivotTables (3 hours)

Spreadsheet Tools Moving between Spreadsheets, Selecting Multiple Spreadsheets, Inserting and Deleting Spreadsheets Renaming Spreadsheets, Splitting the Screen, Freezing Panes, Copying and Pasting Data between Spreadsheets, Hiding , Protecting worksheets (4 hours)

Making Macros Recording Macros, Running Macros, Deleting Macros (2 hours)

Outcomes:

1. Students will be able to improve their understanding on Excel
2. Students will be able to understand Formulas in Excel
3. Students will be able to apply descriptive statistics through Excel
4. Students will be able to solve advanced analysis like hypothesis testing through Excel
5. Students will be able to solve Macro problem through Excel

Value Added Course

MATLAB Programming for Biomedical Engineers

Detailed Course Syllabus:

1. Introduction to Matlab
 - Introduction
 - Computer Programming
 - MATLAB
 - The MATLAB Environment
 - Help
2. Introduction to Computer Programming and MATLAB
 - Variables, Arrays and Simple Operations
 - Data Types
 - Loading and Saving Data
 - Visualizing Data
 - Curve Fitting
 - Matrices
 - MATLAB Scripts
 - Comments
 - Debugging
 - MATLAB Debugger
 - MATLAB Code Analyzer
3. Control Structures
 - Introduction
 - Conditional if Statements
 - Comparison/Logical Operators
 - Conditional switch Statements
 - Iteration: for Loops
 - Iteration: while Loops
 - Note about Efficiency
 - break and continue Nesting Control Structures
4. **Basics of Signal Processing using MATLAB**

- Signals read & write and Display
- Signal Preprocessing
- Signals Plotting

5. **Basics of Image Processing using MATLAB**

- image read & write and Display
- Image Preprocessing
- Image Cropping, Negative and Contrast Enhancement

6. Two Projects on biomedical Signals and Image

Value Added Course

Applications of Internet of Things (IoT) in Healthcare

Detailed Course Syllabus:

1. Introduction to IOT
 - Understanding IoT fundamentals
 - IOT Architecture and protocols
 - Various Platforms for IoT
 - Real time Examples of IoT
 - Overview of IoT components and IoT Communication Technologies
 - Challenges in IOT
2. Arduino Simulation Environment
 - Arduino Uno Architecture
 - Setup the IDE, Writing Arduino Software
 - Arduino Libraries
 - Interfacing LED, push button and buzzer with Arduino
 - Interfacing Arduino with LCD
3. Sensor & Actuators with Arduino
 - Overview of Sensors working
 - Analog and Digital Sensors
 - Interfacing of Temperature, Humidity, Motion, Light and Gas Sensor with Arduino
 - Interfacing of Actuators with Arduino.
 - Interfacing of Relay Switch and Servo Motor with Arduino
4. Basic Networking with ESP8266 WiFi module
 - Basics of Wireless Networking
 - Introduction to ESP8266 Wi-Fi Module
 - Various Wi-Fi library
 - Web server- introduction, installation, configuration
 - Posting sensor(s) data to web server

5. Blynk
 - Introduction to blynk
 - Interface with Arduino
 - Making of Graphical user Interface
6. Projects

- Objective:**
1. SCADA provides an appealing scheme for remote control and observation of renewable energy sources.
 2. To provide knowledge of fundamentals and development of Smart Grid, from the basic concepts of power systems.
 3. To understand the development of the smart grid.

Pre-requisite: Transmission and Distribution (EE 14.301)

1. Introduction to Smart Grid: Smart Grid Concept - Definitions and Need for Smart Grid - Functions - Opportunities - Benefits and challenges, Difference between conventional & Smart Grid. [4]
2. Introduction to SCADA: Evolution of Automation systems, History of Power system Automation, Supervisory Control And Data Acquisition(SCADA) Systems, Components, Building blocks and Classification of SCADA systems, Advantages of SCADA in power system, Applications SCADA. [6]
3. Energy Management System: Smart substations - Substation Automation - Feeder Automation, SCADA - Remote Terminal Unit - Intelligent Electronic Devices - Protocols, Phasor Measurement Unit - Wide area monitoring protection and control, Smart integration of energy resources - Renewable, intermittent power sources - Energy Storage. [7]
4. Distribution Management System (DMS) : Volt / VAR control - Fault Detection, Isolation and Service Restoration, Network Reconfiguration, Outage management System, Customer Information System, Geographical Information System, Effect of Plug in Hybrid Electric Vehicles [7]
5. Smart Meters: Introduction, Advanced Metering infrastructure (AMI), AMI protocols - Standards and initiatives, Demand side management and demand response programs, Demand pricing and Time of Use, Real Time Pricing, Peak Time Pricing. [6]

Outcome: At the end of this course the student is expected to have understood the following:

- To understand the concepts of power system automation and components of SCADA systems.
- Get acquainted with different smart devices and smart meters.
- Identify suitable communication networks for Smart Grid applications.

DIPLOMA IN JAPANESE

Programme Level: Diploma

Duration: One Year (Two Semesters)

No. of Seats: 20

Objective:

Japan is the first country in East Asia to tread the path of economic modernization and become a global power. The successful partnership between the industries of India and Japan has further opened up tremendous job opportunities for Indian youth armed with knowledge of Japanese language. In this scenario, the need to introduce a diploma course has strongly been felt.

This diploma course intends to cater to those students who have a basic knowledge of Japanese and who further want to enhance their Japanese language skills. After the successful completion of this course a student would be able to listen and comprehend conversations encountered in day to day life. One would also be able to read and understand passages on familiar daily topics written in basic vocabulary and kanji (Approx. 300). Apart from this, the said course aims to help in developing cross-cultural understanding between India and Japan that would strengthen the cultural and economic relationships between these two Asian economic powers.

The first batch of the programme in MITS is proposed to be admitted in the session 2013-2014.

Input Qualification:

Candidate should have completed one year certificate course in Japanese from MITS, or equivalent.

Evaluation Procedure:

All Rules and Regulations as provided in the Ordinances and Regulations of Undergraduate Programmes shall be followed.

Soft Skills and Interview Skills

Course Objective: All employers today want employees with not just a good academic record and technical skills but also excellent soft skills, communication and interpersonal skills, negotiation, team work, conflict handling and presentation skills. These employability skills are in huge demand and indeed play a crucial role in developing the personality of students so that they can set themselves apart from the competition, crack interviews and transition into various leadership roles. These life skills will help build the attitude and dynamism so that they become go-getters in life.

Section – A: Soft Skills

Course Content

- 1) **Goal Setting + SWOT Analysis:** As students venture into their careers it is important to be able to look at the bigger picture. This module will enable students to list down and subsequently achieve their short, long and mid-term goals. They will identify what prevents people from achieving their goals and how to ensure that they achieve their goals each time following the SMART goal methodology. They will also understand their skills better by listing them in the SWOT (Strengths, Weaknesses, Opportunities and Threats) as per their goals. [2]
- 2) **Stress Management:** In this fast paced world where everyone is running the rat race and wants to achieve everything in life. This results in an incredible amount of multi-tasking which results in high stress situations which eventually affects physical and mental health. This module will enable students to handle high stress situations with aplomb [2]
- 3) **Negotiation & Conflict Handling:** We all want leaders who can get us what we want by negotiating on our behalf and manage situations of conflict. These life skills will empower student to build this extremely crucial skill and make them excellent negotiators, whether it is for a salary or a business deal. Being able to maturely handle both internal and external conflict will make them leaders at the forefront of their teams. [2]
- 4) **EQ + IQ + SQ:** Blending together Emotional Quotient, Intelligence Quotient and Spiritual Quotient will enable the students to lead fulfilling and balanced lives. Not only is emotional intelligence a valued skill in employees, knowledge of this module will enable the young prospective employees to build the right habits of work life balance right from the beginning of their professional careers. [2]

- 5) **Presentation Techniques:** PowerPoint presentations are an integral part of our professional lives. Knowledge of designing a powerful, high impact presentation along with the skill of stage presence and excellent public speaking skills makes this module a must-have in today's world. This will enable students to become excellent presenters by improving their confidence, delivery and designing skills.

[4]

Section – B: Interview Skills

Course Content

- 6) **Group Discussion (Level 2):** This module further builds up on the previous understanding of various group discussion techniques like PREP, SPELT, KWA approaches to enable excellence in Group Discussions which are an important part of the recruitment process. Focus will also be on rigorous practice sessions with extensive feedback which will make students ready and confident for such activities in real life situations.

[4]

- 7) **Micro Presentations:** All presentations don't require PowerPoint Slides. Short, powerful presentation and talks which leave a huge impact on the audience and drive them to action is the crux of this module. Again, a must have skill which includes excellent communication skills, compelling body language and dynamic stage presence.

[4]

- 8) **Interview Techniques:** Interviews are usually a student's first interaction with the professional world. With a low rate of conversion in most interviews and the pressure of landing a good job, a lot of students find it difficult to put their best front. This module will enable students to master the end to end interview process, right from designing the right resume, professional dressing and body language to interview techniques including handling difficult questions and honing in on their unique skills and capabilities.
